

SANDER NAVY

A TRADITION OF EXCELLENCE

SANDERNAVY
NAVAL EQUIPMENT

WHEN ACCURACY MATTERS

Working behind the scenes: SANDER NAVY has been the established brand of high quality bronze naval and submarine valves for more than 25 years.

The high-tech work environment and the complex nature of naval missions demand for an extremely reliable and safe technology on board of naval ships and submarines.

Our engineers focus on the components' particular tasks with all their expertise.

All SANDER NAVY products are designed to operate in dangerous environments while remaining affordable and capable throughout their lifetimes.

Our product range comprises:

- / VG standard valves**
- / Bronze DIN valves**
- / Special navy valves**
- / Submarine valves**
- / Actuators**
- / Valves according to NES standard**

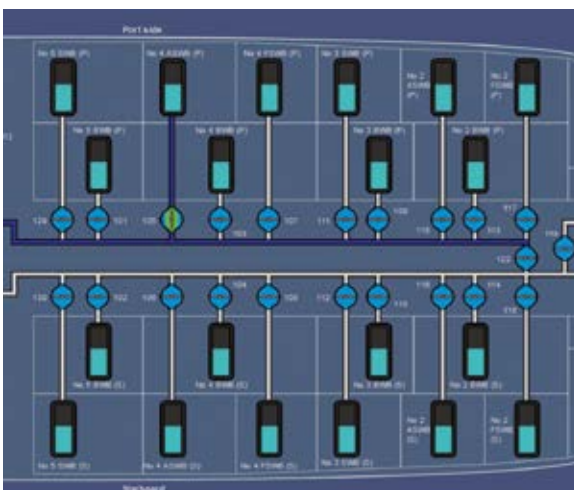

SANDER NAVY QUALITY ASSURANCE

When it comes to engineering and supply of naval equipment, no compromise is acceptable concerning quality and reliability. SANDER NAVY components are field-tested for over 25 years by our clients worldwide.

In order to ensure constant SANDER NAVY quality we carry out extensive testing procedures such as:

Shock resistance, noise and vibration tests, antistatic tests, acceptance and function, pressure tests, material inspection, X-ray

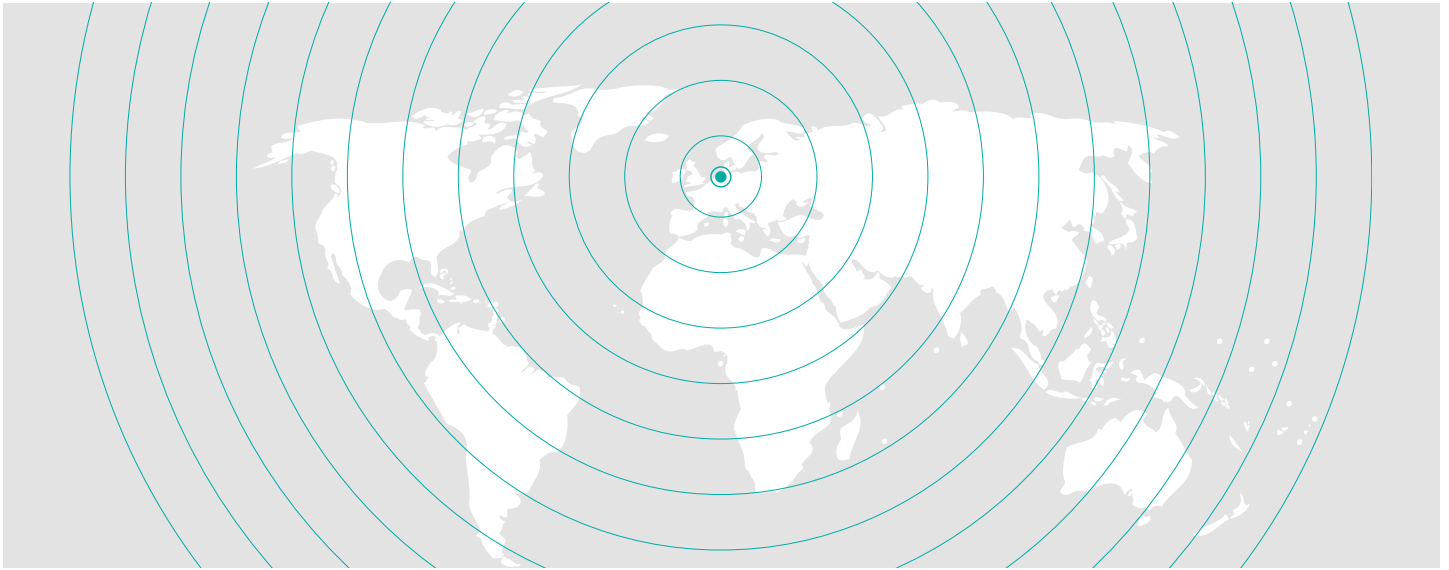

Automation and visualisation systems

It is one of the key benefits of the entire concept that the advanced SANDER automation system and operator interface enables navy crews to concentrate on their core duties and responsibilities while performing naval missions. Please be referred to SANSYS and SANVISU brochures.
